E-Mail: joseph.morra@faa.gov

Joe Morra is a Section Manager with the Federal Aviation Administration's (FAA) Unmanned Aircraft Systems (UAS) Integration Office; AFS-84 (Safety & Data Management) and AFS-87 (Flight Operations) Sections, at FAA Headquarters offices in Washington, DC. The Sections that Mr. Morra manages are responsible for the following:

- AFS-84: collection, analysis, and reporting of all UAS flight program operational and safety data; AFS-84 also supports risk management initiatives related to UAS integration in the National Airspace System (NAS).
- AFS-87: overall standardization and safety of UAS flight operations; AFS-87 provides regulations, policies, guidance, and other information necessary for safe UAS training and operations, and provides standards for training and certification of UAS flightcrew members. AFS-87 is the principal directing element within AFS-80 for the direction, control, and execution of all aspects of UAS flight operations, and collaborates with the UAS community to ensure best practices are implemented.

Mr. Morra's previous experience with the FAA includes positions as a General Aviation Operations Inspector for the Flight Standards District Office (FSDO) in Teterboro, New Jersey and more recently as a Subject Matter Expert in the Flight Standards Headquarters General Aviation and Commercial Division (AFS-800). Having both field and headquarters oversight and policy experience provides Mr. Morra with beneficial tools and the perspective necessary for the safe and timely integration of unmanned aircraft into the national airspace. Prior to working for the FAA, Mr. Morra owned and managed flight training and other small businesses for over 10 years.

Mr. Morra holds a Bachelor's degree from Whittier College in California. He is a flight instructor and maintains his airline transport pilot (ATP) Certificate.
